

## Task 2 : Analyzing Phishing Email sample

Tools : Online Header Analyzer, Text Editor

### Indicators of Phishing:-

- Sender's Email Address:-  
Sender is pretending to be someone from X
- Grammatical errors:-  
Instead of "posted on X" it's mentioned "posted X". Furthermore we can even notice informal capitalization errors
- Fake/Unfamiliar Organization:-  
We can see @Novacorp being used which seems to be a dummy company
- Timestamp:-  
The time mentioned is in may 2025, and the email itself was sent in march '24

Conclusion:- Studied about various forms of phishing, and different ways to rectify it.
